“ UNDER THE LAIR ”

“ UNDER THE LAIR ”

Under the lair is a trend book containing Macro trends and their micro trend stories. The title is suggestive of the fact that a person's mental health, etc. is always in layers and segments, and the word lair suggests a housing place for concepts like AI, metaverse.

A world in which a lot of things co-exists and a place where one can accept their own self. Our brains is also a housing place for memories which brings in the nostalgia point.

A person is shown sleeping in a bed, partially covered by a white sheet. The scene is illuminated by a warm, orange light, likely from a lamp, creating a cozy and peaceful atmosphere. The background is dark, and the overall color palette is dominated by warm tones and deep blacks.

Sleep well baby

Mental Health | Self Acceptance | Self Love

Brands and organisations have started looking for methods to add to that comfort as individuals experience and value having a healthy, sound mind and embracing themselves.

Now, in addition to neurobic exercises, strategy games, and energy-dense foods, one can now crush their insecurities, pain or anything they may have in addition that irritate them in places like the smash room and advance toward liking their own company and self-love above all else. Therefore, in the path of a sound mind. Self-acceptance, self-love, and self-care are the key ideas.

One can visit cafes and sit alone at tables intended for one without worrying about criticism or societal acceptable rules.

Key drivers

- Changed from collective to individualistic in its meaning
- More self-acceptance and a desire for a tranquil, balanced, and healthy mind
- Willingness to try to solve problems on one's own rather than with others
- Motivation and desire to manage one's own deficiency and de-stress in settings like smash rooms, etc
- Obtaining joy from solitude, going on a date with oneself
- Restaurants and eating establishments have begun to erect tables (Table for 1) that may accommodate just one diner.

Key words :

Selfcare

Table for one

SELF representation

Inclusivity

Happy head

Head biceps

Iloveme

Lets smash the pain

Micro Trends

Hello to your topsy turvy

As people have started understanding the importance of mental health and things they can do or habits they can incorporate in their daily lives, they are now moving towards more mindful ways of living and doing things' **puzzles, neurotic exercises, superfood packed diet**, going to talking circles, having a crying buddy, places where people pay to smash things, etc are some of the ways which have come up to help one cope up and keep a balanced mind. People now understand their own capabilities and indulge in activities as per their own individual mental health.

Dekho magar pyaar se- Date yourself first

Self acceptance, self validation along with "me time" are some of the ways people have been enjoying themselves and are bound to enjoy in the coming time. Self love and acceptance of self and others is something that keeps the mind at bay.

Log kya kahenge

Realization that what other people say shouldn't really matter more than what one thinks about their own self is the mindset that has helped people move forward into accepting their own self and their own true identity and inculcating what they like into their personalities. Brands have come up with a "made for you-just like you" in a lot of product ranges and experiences. For example custom hair oil, custom made makeup, etc.

Nostalgia |
Culture and tradition

The diversity variance extends to language, culture, food, attire, and whatnot. By a new crop of cultural guardians and rising sentiments of nostalgia, the significance of art, design and cultural legacy will be highlighted globally as a crucial component of soft power.

Cultural guardians can now conserve and promote legacy and childhood nostalgia using more than just digital platforms; they can also do so with the help of architecture, designs etc.

Micro Trends

Nostalgia nuggets

Positive allusions from the 1990s, 1980s, and even the 1970s that are included into brand messaging humanize products and create deep ties between the past and present. Brands combine the old and new together to create warmth and a little disturbance, injecting nostalgia into an authentic partnership of the past and present.

Cultural contrast

By shedding light on the underlying ideas, beliefs, attitudes, and behavior's of a reference culture, blending and interacting with people from other cultures can create a mirror image of that culture. Population, way of life, culture, preferences, habits, and traditions are all intimately intertwined. These elements are produced by the neighborhood and frequently inherited from one generation to the next.

Key Drivers

A powerful brand narrative has been created around nostalgic feelings and the promise of a return to childhood innocence as a result of the millennial generation's obsession with goods like paper boats. Bicycle riding, indoor board games, bomber jackets, themed dress-up for cultural celebrations in school have all been strongly influenced by Stranger Things.

People always try to empathise strongly with every occasion and every virtue in order to access their cultural emotions. Textile designer and artist Shradha Kochhar has captured the childhood memories of her first knitting lesson from nani and the small gestures of care and solidarity in her work, a knitted wall hanging, titled which depicts physical touch and exchange between her and her nani.

Memories, whether good or bad, are always present in our minds. These memories are reactivated each time we encounter a painting or other piece of art. We don't discount history or religion.

Chandigarh based artist Gurjeet Singh used his art to reflect his harsh, bullied upbringing, transformed a reminiscence from his boyhood into a soft toy sculpture without deviating from the Sikh culture.

A photograph of Kochhar's mother and aunts hangs in her bedroom, below a row of yarns.

"Your wrinkled hands and my beautiful hands," a knitted wall hanging by Kochhar, shows their physical interaction and exchange between her and her nani

Metaverse of Madness

Metaverse | Virtual world | AI art

Technology will lead to a new evolution in how we perceive our surroundings, whether it's in the commercial or entertainment realm. Technology like AR, VR, and AI is likely to advance and create remarkable user experiences with a dash of customization.

Key drivers

To experience the melding of the real and virtual worlds in an immersive plane of existence, people are drawn to popular events where they can coexist while utilising technological advancements. In the metaverse, well-known performers like Ariana Grande and Justin Beiber entertained crowds and introduced them to new age music.

People are curious about how technology may help them form connections with like-minded people, groups, and cooperative exchanges.

Because of the intimate connection between our senses and memory, brands have a high recall value. The majority of the senses are satisfied by cutting-edge user experiences created with developing technology.

People are experiencing an augmented reality representation of IKEA's furniture in their apartments by using the Place app. They will feel comfortable and respected when they receive individualised experiences from brands across numerous media. The capacity of the future will be increased by people's desire to engage in this new ecosystem and avoid falling behind.

Micro Trends

Immerse in Musical Land:

The metaverse is the next evolution of the internet; it can use technology like augmented and virtual reality to immerse yourself in a vibrant digital world. The metaverse is already shaking up the entertainment world. The use of AR & VR to create effects like holograms will add incredible immersive experiences to the entertainment world. The ABBA Voyage experience in London is an excellent example of how immersive technology enhances the entire concert experience.

A Digi-Historical Walk:

In order to boost tourism in India, it aims at digitization of ticketing systems, tourists data management along with developing experience centers which demonstrates the rich culture and history leveraging immersive VR-tech. Red Fort in Delhi sets a great example for delivering an excellent sensorial experience to the visitors leveraging AR, VR to tell the historical importance of the monument.

Magician's Lair- AI art:

In the segment of Art, Illustration, Storytelling and Design, Visuals have always played the most important part. Looking at those various artists, designers and people who were working in the segment of Digital art are now generating their own art. Yes, not creating but generating Artworks and artpieces. It's a two minute game and you have a ready artwork generated via Artificial Intelligence.

अमेरिका में युवाओं में लोकप्रिय हो चुका है यह ट्रेंड

अब बिना बटन लगाए जीन्स पहनने का नया फैशन ट्रेंड

न्यूयॉर्क में स्ट्राइपर मैगलाना अर्थात् ने उनकी मदद की। न्यूयॉर्क यूनिवर्सिटी में पहले साल की स्टूडेंट प्रिया जैन कहती हैं कि मुझे यह फैशन अपनाने में कोई संकोच नहीं क्योंकि 'रेडिप्ले' वाली शैल के लिए यह फैशन ज्यादा इम्प्रोविस लहारा है।

यह ट्रेंड तो बहुत कूल है

श्री यूनिवर्सिटी में फिल्म स्टडी की स्टूडेंट देव मेहनकारी कहती हैं कि यह फैशन बहाल है कि हम जो चाहते हैं, वह पहना इसके लिए ज्यादा बेतार है। मैं किंग बटन के जीवन पहनना पसंद करती हूँ। यह सिंगले और बटन हैं। यह 'वाल्ड ग्रीनवॉल' में फैशन स्टडी की प्रो. एम मैकमेनडिस कहती हैं कि एक स्ट्रिपटेड पैन्ट और लगे गडब गडस के बीच एक तरह का संयोग फैशन है।

आप तो गजब लगा रही हैं

कैंसिकॉर्निया की 25 साल की ओप्री सर्ली ने इन्फ्लाय में इन ट्रेंड को अपना लिया था। वे कहती हैं कि अगर आरामियस के लुक कुछ भी पहनीं, लोन आरके; आरामियस और आरबी जर्नी का जैटिंग लोके है। वे कहती हैं: 'यू लुक अरॉगिज (अगर तो हावम लग लो है)।' फायर जिनियसस लोके रिले के बारे में कि फायरम यह टैट की प्रोजेक्स केन हट्टी और केडमन जेकर की रीसिप्रिकल ने की की फायरम हरेम हू कहती हैं कि यह लोके किंग बटन की जैन्स में शब्दी परियर के एक रूप में जेय की तं मेरे सेलम ने किने किनेरकोकी विंग का इस्तेमाल किया।

Vegan Chicken: The All-in-one guide

There is no one way to be a woman

For Parthana Prasad, content creator, #breakthebias means there is no one way to be a woman. "A woman who wears suits, dates other women and loves to bake is still a woman," she says. Prasad is breaking biases in heterosexual and cisgendered stories with her authentic LGBTQIA+ content. When she started, there was homophobia, while fear of online hate or offline harassment persists. "But the public response was overwhelmingly positive. A lot of people told me how much they saw their own stories, feelings and thoughts reflected in mine and that it was the first time they felt that kind of relatability," she says.

No more taboo topics

Simran Balar Jain, a content creator, is breaking biases and in the process, busting myths around sexual health, menstruation and personal hygiene. Jain is popular for her candid videos, where she speaks to her audience like she is chatting with her friends on 'hushhush' and 'taboo' topics. "I unpack uncomfortable topics as there is a dearth of material on sex education and related issues," she says, explaining how she researches and collaborates with doctors in some matters. Jain has faced her share of trolls and hate for venturing into so-called 'no-go' zones. "But I have also received motivating feedback," she adds.

<https://www.instagram.com/hallyutalk/>

A stylized illustration featuring a dark blue hand holding a magnifying glass. The magnifying glass is positioned over a red background. A bright purple beam of light enters from the left and passes through the handle of the magnifying glass. In the upper left area, there are several concentric circles of varying sizes, suggesting a lens or a search function. The overall composition is clean and modern.

“ UNDER THE LAIR ”
